

IPAD-WIFI CASE STUDY

PROVIDING INNOVATIVE EVENT TECHNOLOGY SOLUTIONS

CHALLENGE

One World Rental's project managers often get asked questions regarding the strength of Wi-Fi to run certain applications.

We are happy to assist with qualifying venue questions which will help to ensure a seamless event. But this cannot always guarantee satisfactory results.

SOLUTION

To negate this, One World Rental created plug and play Wi-Fi kits.

This consists of an enterprise router with a personalised carry case and protective covering that can simply be plugged into any wall socket.

This allows the event organiser to have a plan B in case the main internet supply should be interrupted.

RESULT

The Plug and Play became so popular that it has become a successful product line itself instead of an accessory.

The Plug and Play Wi-Fi is perfect for corporate meetings, Event Check in, or Application demonstrations.
